Projects

AI ChatBot

[🔗 Live](#) [</> Code](#)

- Built a real time response ChatBot using React and Google Gemini API
- Includes a state variable to store messages and a function to handle user messages
- When the user types a message, it is sent to Google Gemini API to retrieve a response

Movie Search Website

[🔗 Live](#) [</> Code](#)

- Built a real time Movie Searching Website using React and OMDB API
- When a user enters a search term and clicks "search", the app displays a list of movies related to the search term.
- The user can then click on a movie poster to see more details about the movie
- The app also includes a back button that allows users to return to the previous page.

Image Search Website

[🔗 Live](#) [</> Code](#)

- Built a real time Image Searching Website using HTML, CSS, JavaScript and Unsplash API
- When a user enters a search term and clicks "search", the app displays a list of Images related to the search term.
- The user can then click on a movie poster to see more details about the movie

GTA-5 Clone

[🔗 Live](#) [</> Code](#)

- Built a GTA-5 Clone using Tailwind Css

Skills

- React Js
- Redux
- Git
- GitHub
- Tailwind Css
- Bootstrap
- Javascript
- HTML
- CSS

Education

Bachelor of Computer Sciencs
7.9CGPA

Sept 2021 – Apr 2024
Bangalore, India
